In-Wall Rear Projection

SMART Board™

interactive whiteboard

Create a polished, professional work space

Transform your space into a professional, productive work environment with the In-Wall *Rear Projection* SMART Board interactive whiteboard. Combining the power of a computer and a projector, an interactive whiteboard is the ideal tool for presenting, collaborating and training.

Built right into the wall of your room, the interactive whiteboard creates an open and impressive work area that provides you with maximum floor space and the sophistication of a rear-projection system. You can work naturally, without any shadows or equipment in the way. Choose between an all-in-one solution that includes a projection system or a screen-only model that works with your own projector and mirror setup.

Make a big impression

Capture the attention of your colleagues and clients by simply touching the screen to move through a presentation, control computer applications and navigate websites. Pick up a pen or use your finger to highlight material. Engage meeting participants by including their feedback and writing notes over any application or website, and then capture, edit and save all your work in a single file. Use the interactive whiteboard for the visual component of a complete conferencing solution. Available in the largest shadow-free interactive display size on the market, SMART's in-wall interactive whiteboards give your ideas room to grow.

"The in-wall solution integrates well into our room and makes the meeting environment look very professional. The SMART Board interactive whiteboard technology is easy to learn and its capabilities have made our meetings run smoothly and successfully."

*Krissy Krippene, Sales Manager
Meetings Express, Intercontinental The Barclay New York
New York, New York, U.S.*

The space-saving mirror stand is less than 30" (77 cm) deep to maximize work space.

Features

Front view

Touch system – DViT™ (Digital Vision Touch) technology is the magic behind SMART's proprietary optical touch system. It lets you use your finger as a mouse and write in digital ink on the screen over any application or website – without special tools or reduction in image quality.

Save function – Save all your work to a single file that works with, or is compatible with, both Windows® and Mac OS operating systems. Notes and graphics are saved as objects that you can manipulate and reorganize. Or, write and save notes directly into popular Microsoft® Office applications and AutoCAD®.

SMART Pen Tray – Sensors detect when a pen or eraser tool is picked up from the SMART Pen Tray. Buttons on the tray allow you to choose an On-Screen Keyboard or a right-click.

SMART screen – The diffusion screen reduces glare to deliver a high-contrast, uniform image with a wide viewing angle.

Wireless keyboard and holder – Use the standard Microsoft Windows operating system keyboard with a built-in trackball.

SMART Board Software

Available in Windows operation systems, Mac OS operating system software, Linux® operating systems.

Notebook™ software – Create, manage and save corporate materials into a single, presentation-ready file. Share and export files to clients and colleagues. Integrate digital content, such as Adobe® Flash® files and audio and visual components into presentations. Arrange pages using the Page Sorter. Use Dual Page Display to view two pages simultaneously. You can draw, take notes and attach files or link to objects and websites on either page.

Ink Aware – Use a pen from the pen tray or a Pen button to write directly into Ink Aware applications, such as Microsoft Excel®, PowerPoint® slides, Word files and AutoCAD and save notes in these files.

SMART Board Tools – Type with the On-Screen Keyboard, make a video file with the SMART Recorder, write over video with the SMART Video Player and focus and prioritize concepts with the Screen Shade and Spotlight.

LinQ™ software – Connect quickly between devices using a wired or wireless network. Use a laptop to project onto and control the interactive whiteboard (and vice versa).

Side view

Wall-mounting kit – Includes brackets, screws, pen tray template and installation guide.

Projection system* – Includes an installed true XGA (1024 x 768) projector with short-throw lens and 2,500 lumens, and a space-saving, height-adjustable SMART mirror stand. The mirror stand is less than 30" (76.2 cm) deep.

Warranty – Two-year limited equipment warranty on screen, cabinet and projector.

* Applies to the 2976 and 2876 models only

The in-wall series

Model	SMART mirror stand and projector	Active screen area (diagonal)
2976	Included	84" (213.4 cm)
2876	Included	72" (182.9 cm)
1910	Not included	84" (213.4 cm)
1810	Not included	72" (182.9 cm)
1710	Not included	66" (167.6 cm)

System requirements for Windows Operating Systems

Pentium® II 450 MHz processor • 128 MB of RAM (256 MB recommended) • 136 MB of free hard disk space for minimum installation (511 MB for full installation with Gallery Collections) • Windows NT 4.0 (SP6), Windows 98 operating system or later • Microsoft Internet Explorer 6.0 or later • Macromedia Flash player version 8

System requirements for Macintosh computers

700 MHz processor (1 GHz or faster recommended) • 128 MB of RAM (256 MB recommended) • Mac OS X versions 10.3.9 and 10.4 • 148 MB of free hard disk space for minimum installation (423 MB for full installation with SMART Essentials for Educators: Gallery Collections for Notebook Software) • SMART Board software version 9.5 supports Intel® processors (Universal Binary) • Safari 1.3.2 or later Macromedia Flash player version 8

System requirements Linux operating systems

Pentium II 450 MHz processor • 128 MB of RAM (256 MB recommended) • 185 MB of free hard disk space for minimum installation (460 MB for full installation with Gallery Collections) • Linux kernel version 2.6 or later (2.6.13 or later to use DT770 hardware) • X Window system version 11 release 6 (X11R6) or higher that supports XRENDER and Xinerama • glibc 2.3.3 (gcc 3.4.2) • libstdc++6 • GNOME™ 2.8.0+ or KDE® 3.3+ libraries recommended • SUSE® 10, Red Hat™ Enterprise Linux 4 WS or Fedora™ Core 3+
