

Symposium™

interactive pen display

The perfect presentation tool

An effective presentation is more than just words spoken. A strong message is based on both verbal and nonverbal messages. That's why the Symposium interactive pen display is the ideal tool for you to maximize your presentation. You can engage your audience, increase interactivity and impress even the most techno-savvy veterans in the room.

All you need to do is touch the screen with the pen and you can control computer applications or write in digital ink, while your audience sees the same image projected on a large screen.

Just write

Operating the Symposium interactive pen display is easy. Just connect the display to your computer and a projector and you're set. You can launch and control applications, open files and write with digital ink over material including PowerPoint® slides, websites and moving videos, all while your audience sees the same image projected on a large screen.

Stand and deliver

With the Symposium interactive pen display, you don't have to move from computer to projector, creating distractions and wasting valuable time. Whether you are collaborating on a project or are making a presentation, you are the one who controls the pace and flow, making the presentation an active, dynamic process.

If you are collaborating with a few colleagues, you can work from where you're sitting. If you are presenting in a larger setting, the Symposium interactive pen display allows you to comfortably interact with your material without losing eye contact with your audience. When finished, save your notes into one convenient file that can then be distributed in several formats.

"Prior to owning our Symposium interactive pen display, we had to hold our quarterly meetings off-site or rent equipment for presentations and audio. Now, our Symposium product allows us to provide top quality presentations to our staff and clients, and will pay for itself in no time."

*Jay M. Copenhaver, Chief Information Officer/Assistant Vice-President,
GAI Consultants, Inc., Homestead, Pennsylvania, U.S.*

Control computer applications and write notes on the LCD screen while your audience sees the same image projected on a larger screen.

Features

The ID350 is perfect for situations that require versatility in a compact package.

The ID370 is ideal when visibility and clarity are critical, especially when displaying highly detailed material.

Interactive screen – Control your computer with the pen tool. Write over any application. The pen tool is the point of contact on the screen, so you don't have to worry if you brush the screen with your palm or sleeve. Each screen display is designed with sharp corners, straight sides and a flat bezel, so there is nothing to impede your natural writing flow.

Save function – Capture your work in Notebook™ software or save notes directly into several software applications, including Windows® versions of Microsoft® PowerPoint, Word and Excel®, or into AutoCAD® software.

Battery-free tethered pen – Write smoothly and comfortably with the securely attached pen. Because the pen is battery-free, there's no maintenance cost or downtime searching for replacement batteries.

Pen-tool buttons – Change ink color, or use the eraser without crowding your display with toolbars.

Function buttons – Quickly access the right mouse button, On-Screen Keyboard, Screen Capture tool, Floating Tools toolbar and Notebook software.

On-screen display buttons – Fine-tune display properties to suit your preferences.

Adjustable tilt stand – Move the console to a comfortable viewing angle.

VESA mounting plate – Integrate the Sympodium ID350 and ID370 interactive pen displays with any standard VESA mounting arm (75 mm for the ID350 and 100 mm for the ID370).

System requirements for Windows operating systems

Pentium® 150 MHz processor (450 MHz or later recommended) • 128 MB of RAM (256 MB recommended)
 • Available powered USB port • Approximately 160 MB of free hard disk space for a full installation •
 Windows NT 4.0 (SP 6.0), Windows 98 operating system or later • Microsoft Internet Explorer 5.0 or later •
 Macromedia® Flash® player version 7.0.19 (recommended)

System requirements for Macintosh computers

400 MHz processor (800 MHz or faster recommended) • 128 MB of RAM (256 MB recommended) • Available
 powered USB port • 50 MB of free hard disk space for minimum installation, 115 MB for full installation with
 Gallery Collections • Mac OS X version 10.1.5 or later (Java version 1.3.1 update 1) Other versions of SMART
 Board software are available for UNIX® and Linux® systems, as well as for earlier Windows or Macintosh
 operating systems.

System requirements Linux operating systems

Pentium II 450 MHz processor • 128 MB of RAM (256 MB recommended) • 185 MB of free hard disk space
 for minimum installation (460 MB for full installation with Gallery Collections) • Linux kernel version 2.6 or
 later (2.6.13 or later to use DT770 hardware) • X Window system version 11 release 6 (X11R6) or higher that
 supports XRENDER and Xinerama • glibc 2.3.3 (gcc 3.4.2) • libstdc++6 • GNOME™ 2.8.0+ or KDE® 3.3+
 libraries recommended • SUSE® 10, Red Hat® Enterprise Linux 4 WS or Fedora™ Core 3+

Pen-tool buttons

Function buttons

USB connection – Easily connect the ID350 or ID370 to your computer.

USB hub – Enhance your presentation by connecting a memory key, document camera or other peripherals to the two 2.0 high-speed ports.

RGB video pass-through – Enhance your presentation by connecting a wireless microphone, document or other peripherals using the two ports in the USB hub.

Warranty – Two-year limited warranty.

Dimensions: ID350

Active screen area	15" (38.1 cm) diagonal
Size	13 1/2" W x 1 7/8" D x 11 3/4" H (34.3 cm x 4.8 cm x 29.9 cm)
Weight	10 lb. (4.6 kg)
Resolution	XGA (1024 x 768)

Dimensions: ID370

Active screen area	17" (43.2 cm) diagonal
Size	15 3/4" W x 2 1/4" D x 14 1/4" H (40.0 cm x 5.7 cm x 36.2 cm)
Weight	13 lb. (6.0 kg)
Resolution	SXGA (1280 x 1024)

The Sympodium ID350 and ID370 interactive pen displays are part of the SMART family of products, the same company that brought the award-winning SMART Board™ interactive whiteboard to more than 7 million users around the world.

SMART Board Software

Available in Windows® operation systems, Mac OS operating system software, Linux operating systems.

Notebook™ software – Create, manage and save corporate materials into a single, presentation-ready file. Share and export files to clients and colleagues. Integrate digital content, such as Adobe® Flash® files and audio and visual components into presentations. Arrange pages using the Page Sorter. Use Dual Page Display to view two pages simultaneously. You can draw, take notes and attach files or link to objects and websites on either page.

Ink Aware – Use a pen from the pen tray or a Pen button to write directly into Ink Aware applications, such as Microsoft® Excel, PowerPoint slides, Word files and AutoCAD and save notes in these files.

SMART Board Tools – Type with the On-Screen Keyboard, make a video file with the SMART Recorder, write over video with the SMART Video Player and focus and prioritize concepts with the Screen Shade and Spotlight.

LinQ™ software – Connect quickly between devices using a wired or wireless network. Use a laptop to project onto and control the interactive whiteboard (and vice versa).
