

SMART Board™ for Flat-Panel Displays

Interactive Overlay

Touch the screen to control your computer

Write in electronic ink

Save your work in various formats

Attach easily to your flat-panel display

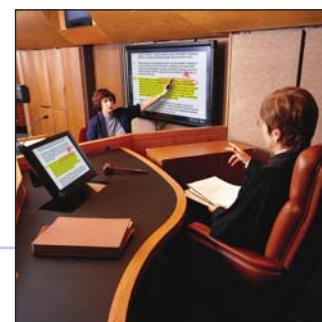

The perfect touch

The SMART Board for Flat-Panel Displays interactive overlay gives you touch control of your display. With it fastened securely to your display, you simply touch the overlay to control computer applications, give presentations and navigate Web sites – your finger becomes the mouse. To highlight information, just pick up a pen. You can write over any application or Web site and capture, save, edit and e-mail all your work.

You work with the same high-quality image you expect from your display. The overlay is powered by an innovative touch system that requires no layered screen. A touch-friendly surface protects your panel while retaining superior clarity.

The overlay makes the most of your display, turning it into a powerful tool for presenting and collaborating.

Supported Flat-Panel Displays

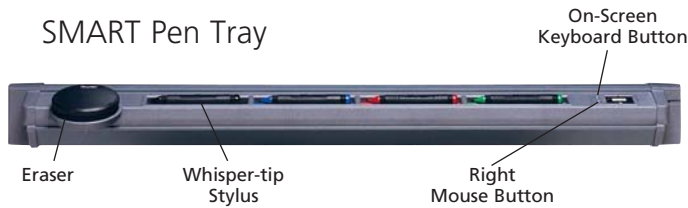

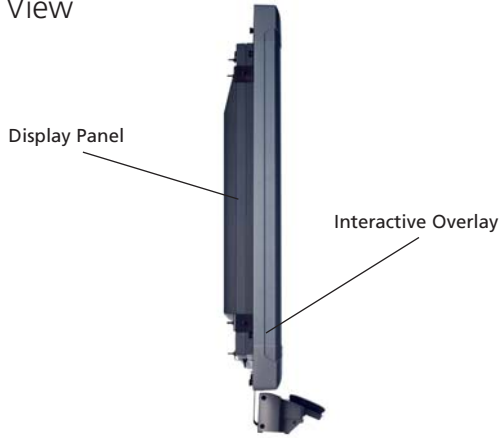

Available for a wide range of plasma and liquid crystal display panels. For an up-to-date list, visit

www.smarttech.com/overlay/panels

Features

Touch System

DVIT™ (Digital Vision Touch) technology, developed by SMART (patents pending), lets you use your finger as a mouse and write on the screen – without any special tools. DVIT technology uses cameras in the corners to track contact on the screen.

SMART Pen Tray

Optical sensors automatically detect when a stylus or the eraser is selected, while buttons activate the on-screen keyboard and right mouse click. Whisper-tip™ styluses and eraser included.

SMART Board Software

Control any computer application, write and edit notes, and save everything in a single file. Features include capturing your notes with Notebook™ software, recording audio and data as a synchronized file with SMART Recorder, handwriting recognition, and writing over top of moving or still video. Free upgrades are available. SMART Board software is available for various operating systems and in multiple languages (Windows operating systems only). Visit www.smarttech.com/sbsoftware.

Display Control Strip

Controls your display settings from the overlay (requires an available COM port).

- Sleep Mode blanks screen to prevent image burn-in.
- Input Source Select scrolls through video and image options.
- Display Mode scrolls through screen width options.
- Panel Control Menu accesses panel remote control options.

Protective Surface

Touch-friendly surface reduces glare and protects your display.

System Requirements

Windows Operating Systems

Pentium® 150 MHz processor (Pentium II processor or later recommended)

48 MB of RAM (128 MB recommended)

Windows NT® 4.0 (SP-6), Windows 98 operating system or later
